DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

1-21 Claims 1-27, 33, 34, 35, 40, 41 are drawn to multiple products, produceable in a mammalian host cell as secretable and fully functional heterodimer of chimeric proteins with multiple functional parts. For example, each heterodimer in Figure 1 of the specification is a patentably distinct product.

2 Claims 28-32, 33, 34, 35, 41 are drawn to multiple patentably distinct vectors encoding any one of the multiple patentably distinct products in claims 1-27, mammalian host cells, method to produce a heterodimer of chemric proteins made up by specific combination of functional domains and linkers. Each vector is a different invention because it is a patentably distinct product.

3 Claims 36-39 are drawn to method of using any one of the patentably distinct products in claims 1-29. Each method using patentably product is different invention.

The different inventions listed do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The broadly claimed combination is anticipated by prior art such as WO 9701580A (copy provided with the search report). Applicant is directed to choose one specific combination of functional domains and linkers to make up a specific heterodimer.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143). Applicant is advised that a reply to this requirement must include an identification of the specific combination of the functional domain(s) and linkers for the elected product, and a listing of all claims readable thereon, including any claims subsequently added.

Art Unit: 1642

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
